Its registered office is at 1170 Brussels, boulevard du Souverain 25, Belgium.

B.4b Trends affecting the Guarantor and its industry

1. Uncertain economic conditions

AXA BANK's business activities are dependent on the level of banking, finance and financial services required by its customers. Also, the market for debt securities issued by banks is influenced by economic and market conditions and, to varying degrees, market conditions, interest rates, currency exchange rates and inflation rates in other European and other countries. The profitability of the bank's businesses could, therefore, be adversely affected by a worsening of general economic conditions in its markets, as well as by foreign and domestic trading market conditions and/or related factors, including governmental policies and initiatives.

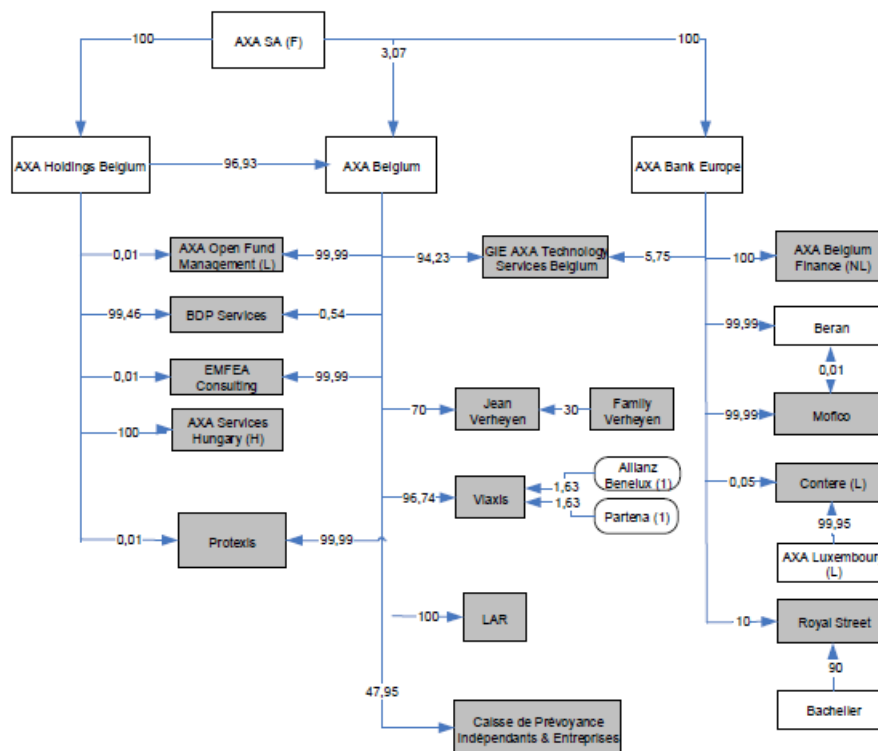

2. Global financial crisis and Eurozone debt crisis

The global financial system has suffered considerable turbulence and uncertainty in recent years and the outlook for the global economy over the near to medium term remains challenging. The default, or a significant decline in the credit rating, of one or more sovereigns or financial institutions could cause severe stress in the financial system generally and could adversely affect the markets in which AXA BANK operates.

3. Increased and changing regulation

Recent developments in the global markets have led to an increase in the involvement of various governmental and regulatory authorities in the financial sector and in the operations of financial institutions. In particular, governmental and regulatory authorities in Europe have already provided additional capital and funding requirements and or may in the future be introducing a significantly more restrictive regulatory environment including new accounting and capital adequacy rules, restrictions on termination payments for key personnel and new regulation of derivative instruments. Current regulation together with future regulatory developments could have an adverse effect on how AXA BANK conducts its business and on the result of the operations.

B.5 Position of the Guarantor in its group

(1) out of group (F) France (L) Luxembourg (H) Hungary (in run off) (NL)The Netherlands

Risk factors

D.2 Key risk specific to the issuer and to the guarantor

Like other banks, AXA BANK faces financial risk in the conduct of its business, such as credit risk, operational risk and market risk (including liquidity risk). Furthermore, AXA BANK faces regulatory risk, the uncertain economic conditions and the competition across all the markets.

Considering the close relationship with, and the guarantee of the obligations of ABF(NL) by, AXA BANK, the risk factors as set out above in respect of AXA BANK may also apply, directly and/or indirectly, to ABF(NL).

. General credit risks are inherent in a wide range of AXA BANK's businesses. These include risks arising from changes in the credit quality of its borrowers and counterparties and the inability to recover loans and any amounts due.

. Market risks are all the risks linked to the fluctuations of market prices, including, principally, exposure to loss arising from adverse movements in interest rates, and, to a lesser extent, foreign exchange rates and equity prices, stemming from AXA BANK's activities.

. Operational risk is the risk of financial or non-financial impact resulting from inadequate or failed internal processes, people and systems, or from external events. The definition includes legal and reputation risk but excludes strategic risk and expenses from commercial decisions. Although AXA BANK has implemented risk controls and loss mitigation actions, and has resources devoted to developing efficient procedures and staff awareness, full protection against operational risks can never be attained, due to the very nature of these risks.

. Liquidity risk management at AXA BANK is guided by internal and prudential liquidity ratios. Strict limits also apply with regard to the part that can be funded in the short term and the part that can be raised on the interbank market.

The Terms and Conditions of the Notes enable each Issuer to substitute itself as principal debtor under the Notes another company of the group to which the Issuer belongs. Such a substitution is subject to certain conditions, including that (i) the Guarantee must remain in place in case of substitution of ABF (NL) and that (ii) the substitute must have a long term credit rating of at least the same level as AXA BANK, in case of substitution of AXA BANK. This substitution aims to enable intragroup reorganisations, such as mergers or reallocation of financing activities within the group (which may be driven by a variety of reasons, such as structural optimization, regulatory changes). A

substitution will result in the Noteholders not having the same issuer as the initial issuer, albeit the substitute issuer will be part of the same group. In case of substitution, a new base prospectus will need to be published if the substitute issuer wants to issue notes under the Programme after that the substitution has become effective.

D.3 Key risk specific to the debt securities

Investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market.

The Notes are exposing investors to foreign exchange risk.

Investment in Fixed Rate Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of Fixed Rate Notes.

No assurance can be given as to the impact of any possible judicial decision or change to Belgian law or administrative practice after the date of issue of the relevant Notes.

In addition, any relevant tax law or practice applicable as at the date of this Prospectus and/or the date of purchase or subscription of the Notes may change at any time.

The investment activities of certain investors are subject to investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent Notes are legal investments for it.

Warning:

A Noteholder's actual yield on the Notes may be reduced from the stated yield by transaction costs.

A Noteholder's effective yield on the Notes may be diminished by the tax impact on that Noteholder of its investment in the Notes.
