B.4b Trends affecting the Guarantor and its industry

1. Uncertain economic conditions

AXA BANK's business activities are dependent on the level of banking, finance and financial services required by its customers. Also, the market for debt securities issued by banks is influenced by economic and market conditions and, to varying degrees, market conditions, interest rates, currency exchange rates and inflation rates in other European and other countries. The profitability of the bank's businesses could, therefore, be adversely affected by a worsening of general economic conditions in its markets, as well as by foreign and domestic trading market conditions and/or related factors, including governmental policies and initiatives.

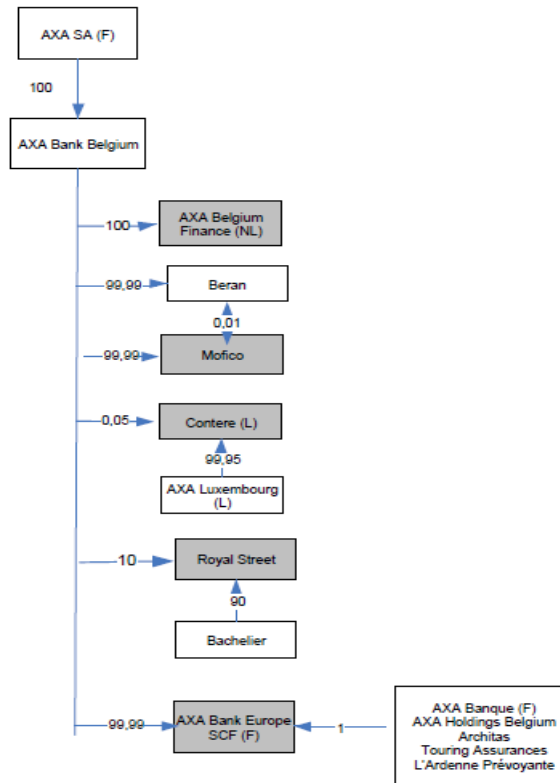

2. Global financial situation

The global financial system has suffered considerable turbulence and uncertainty in recent years and the outlook for the global economy remains challenging. The default, or a significant decline in the credit rating, of one or more sovereigns or financial institutions could cause severe stress in the financial system generally and could adversely affect the markets in which AXA BANK operates.

3. Increased and changing regulation

Recent developments in the global markets have led to an increase in the involvement of various governmental and regulatory authorities in the financial sector and in the operations of financial institutions. In particular, governmental and regulatory authorities in Europe have already provided additional capital and funding requirements and or may in the future be introducing a significantly more restrictive regulatory environment including new accounting and capital adequacy rules, restrictions on termination payments for key personnel and new regulation of derivative instruments. Current regulation together with future regulatory developments could have an adverse effect on how AXA BANK conducts its business and on the result of the operations.

B.5 Position of the Guarantor in its group

Beran: real estate company

Risk factors

D.2 Key risk specific to the Issuer and to the Guarantor

Like other banks, AXA BANK faces financial risk in the conduct of its business, such as credit risk, operational risk and market risk (including liquidity risk). Furthermore, AXA BANK faces regulatory risk, the uncertain economic conditions and the competition across all the markets.

Considering the close relationship with, and the guarantee of the obligations of ABF(NL) by, AXA BANK, the risk factors as set out below in respect of AXA BANK may also apply, directly and/or indirectly, to ABF(NL).

- General credit risks are inherent in a wide range of AXA BANK's businesses. These include risks arising from changes in the credit quality of its borrowers and counterparties and the inability to recover loans and any amounts due.
- Market risks are all the risks linked to the fluctuations of market prices, including, principally, exposure to loss arising from adverse movements in interest rates, and, to a lesser extent, foreign exchange rates and equity prices, stemming from AXA BANK's activities.
- Operational risk is the risk of financial or non-financial impact resulting from inadequate or failed internal processes, people and systems, or from external events. The definition includes legal and reputation risk but excludes strategic risk and expenses from commercial decisions. Although AXA BANK has implemented risk controls and loss mitigation actions, and has resources devoted to developing efficient procedures and staff awareness, full protection against operational risks can never be attained, due to the very nature of these risks.
- Liquidity risk management at AXA BANK is guided by internal and prudential liquidity ratios. Strict limits also apply with regard to the part that can be funded in the short term and the part that can be raised on the interbank market.
- Bail-in risk is the risk that upon a decision of the Resolution Authority the Notes could be converted into Common Equity or be partially or totally written down.

The Terms and Conditions of the Notes enable each Issuer to substitute itself as principal debtor under the Notes another company of the group to which the Issuer belongs. Such a substitution is subject to certain conditions, including that (i) the Guarantee must remain in place in case of substitution of ABF (NL) and that (ii) the substitute must have a long term credit rating of at least the same level as AXA BANK, in case of substitution of AXA BANK. This substitution aims to enable intragroup reorganisations, such as mergers or reallocation of financing activities within the group (which may be driven by a variety of reasons, such as structural optimization, regulatory changes). A substitution will result in the Noteholders not having the same issuer as the initial issuer, albeit the substitute issuer will be part of the same group. In case of substitution, a new base prospectus will need to be published if the substitute issuer wants to issue notes under the Programme after that the substitution has become effective.

D.3 **Key risk specific to the debt securities**

In the event that the Resolution Authority would exercise its write-down or conversion powers (i) the amount outstanding of the Notes may be reduced, including to zero, (ii) the Notes may be converted into ordinary shares or instruments of ownership, and (iii) the terms may be varied (e.g. the variation of the maturity of the Notes). Financial public support will only be used as a last resort after having assessed and exploited, to the maximum extent practicable, the resolution tools, including the bail-in tool.

Provisions for calling meetings of Noteholders permit defined majorities to bind all Noteholders including Noteholders who did not attend and vote at the relevant meeting and Noteholders who voted in a manner contrary to the majority.

No assurance can be given as to the impact of any possible judicial decision or change to Belgian law or administrative practice after the date of issue of the relevant Notes.

In addition, any relevant tax law or practice applicable as at the date of this Prospectus and/or the date of purchase or subscription of the Notes may change at any time.

The Terms and Conditions of the Notes may enable the Issuer and/or the Calculation Agent to make a unilateral modification to the essential features of the Notes or to redeem the Notes before maturity.

In certain circumstances, such as force majeure or some other extraordinary events, the Issuer and/or the Calculation Agent may modify certain features of the Notes or may have the right to monetize or to early redeem the Notes. In order to comply with Book VI of the Belgian Code of Economic Law the following rules will apply for Tranches offered to investors which are consumers in the meaning of the Belgian Code of Economic Law:

(i) Alteration of the essential characteristics of the Notes

The following are authorized:

- alteration of the essential characteristics with the consent of the Noteholders (upon a majority vote), such as the offer of an amended agreement as an alternative for the (authorized) early termination in the case of force majeure;
- alteration of the essential characteristics based on a majority vote by the Noteholders, as provided for in section 9.18 hereafter.

Unilateral alteration of essential characteristics is in principle not authorized except (cumulative conditions):

- as a result of force majeure or of other occurrences which substantially alter the economics of the contract as initially agreed between the parties and which are not attributable to the Issuer (see description of "Extraordinary Events" in section 9.7); and
- the alteration is not substantial, and therefore does not create a significant imbalance in the rights and obligations of the parties to the detriment of the Noteholder; and
- with no retention of costs.

(ii) Unilateral early termination (repayment) of the fixed-term Notes (as well for Variable Linked Notes as for Fixed Rate and Floating Rate Notes)

In case of force majeure

- possible at market value;
- with no retention of additional costs.

In other cases than force majeure

- in principle not authorized except (on the cumulative conditions):

- . as a result of an occurrence which substantially alters the economics of the Notes as initially agreed between the Issuer and the Noteholders and which is not attributable to the issuer; and
- . provided that the Noteholder is compensated and under terms that ensure that no significant imbalance is created in the rights and obligations of the parties to the detriment of the Noteholder:
- . structured Notes with capital protection: either (i) the highest of the face value and the market value (“best of”); or (ii) at least the monetization with the market value as an alternative.
- . structured Notes with no capital protection: the market value;
- . unstructured Notes (a.o. Fixed Rate and Floating Rate Notes) which offer the right to payment of the face value at maturity: the market value or the face value, whichever is the highest (“best of”); and
- with no retention of costs; and
- provided that the costs paid are refunded pro rata (for the remaining term to maturity).

The investment activities of certain investors are subject to investment laws and regulations, or review or regulation by certain authorities. Each potential investor should consult its legal advisers to determine whether and to what extent Notes are legal investments for it.

Investors may not be able to sell their Notes easily or at prices that will provide them with a yield comparable to similar investments that have a developed secondary market.

Notes may be subject to conversion or write-off associated to a regulatory bail-in under the European Union’s Bank Recovery and Resolution Directive (2014/59/EU)

The Notes are exposing investors to foreign exchange risk]

Investment in Fixed Rate Notes, Floating Rate Notes, and Zero Coupon Notes involves the risk that subsequent changes in market interest rates may adversely affect the value of Fixed Rate Notes, Floating Rate Notes, and Zero Coupon Notes.

Warning:

- A Noteholder’s actual yield on the Notes may be reduced from the stated yield by transaction costs
- A Noteholder’s effective yield on the Notes may be diminished by the tax impact on that Noteholder of its investment in the Notes.
