BACKGROUND TO THE ICAV

The following information is derived from and should be read in conjunction with the full text and interpretation section of the most recent Prospectus and supplements for AXA IM World Access Vehicle ICAV (the "ICAV").

The ICAV is organised as an open ended umbrella type Irish collective asset-management vehicle registered by the Central Bank of Ireland (the "Central Bank") on 12 May 2016 and authorised to carry on business as an ICAV, pursuant to Part 2 of the Irish Collective Asset-management Vehicles Act, 2015 and established as an undertaking for collective investment in transferable securities pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and under the Central Bank (Supervision & Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (together the "UCITS Regulations").

The ICAV is structured as an umbrella fund with segregated liability between sub-funds and comprises several funds (each a "Fund", together the "Funds") each representing a separate portfolio of assets. The ICAV has the following active Funds as at 30 June 2023:

Name	Inception Date
AXA IM ACT US Short Duration High Yield Low Carbon	12 September 2016
AXA IM WAVE Cat Bonds Fund	20 January 2017
AXA IM Maturity 2023 Fund	1 March 2017
AXA IM Multi Asset Target 2026	5 June 2018
AXA IM WAVE Biotech Fund	8 April 2019
Delegio Privilege Ambitious Fund	2 June 2020
Delegio Privilege Balanced Fund	2 June 2020
Delegio Privilege Cautious Fund	2 June 2020
Delegio Privilege Entrepreneurial Fund	2 June 2020
AXA IM Euro Yield Target 2028*	14 June 2023

*AXA IM Euro Yield Target 2028 launched on 14 June 2023.

As at 30 June 2023, the following Funds have terminated and have redeemed all shareholders:

Name	Termination Date
AXA IM US High Yield FMP 2022	30 June 2022
AXA IM Sunshine 2023/1	8 February 2023
AXA IM Sunshine 2023/2	17 May 2023

Additional Funds, in respect of which a Supplement or Supplements will be issued, may, with the prior approval of the Central Bank, the Board of Directors (the "Directors") and the consent of State Street Custodial Services (Ireland) Limited (the "Depositary"), be added by AXA Investment Managers Paris (the "Manager").

The shares of the Funds are not listed on any stock exchange.

Past performance is not a guide for future performance.

Investment Objective of the Funds

Each Fund is managed in accordance with the investment objective and policy as set out in the relevant supplement. The assets of a Fund will be invested separately in accordance with the specific investment objective and policies of the relevant Fund. As at 30 June 2023, the ICAV had fourteen Funds approved by the Central Bank, of which there were ten active Funds. AXA IM Sunshine 2023/1 terminated on 8 February 2023 and AXA IM Sunshine 2023/2 terminated on 17 May 2023. The investment objective of each of the ten active Funds and investment objective of the two Funds which terminated during the financial period ended 30 June 2023 are set out below.

AXA IM ACT US Short Duration High Yield Low Carbon

The objective of the Fund is to seek high income by investing in US high yield debt securities whose carbon footprint is at least 30% lower than that of the ICE BofA US High Yield Index (the "Benchmark"). As a secondary extra-financial objective, the water intensity of the portfolio aims at being at least 30% lower than the Benchmark.

BACKGROUND TO THE ICAV (continued)

Investment Objective of the Funds (continued)

AXA IM WAVE Cat Bonds Fund

The investment objective of the Fund is to achieve a long-term, risk-adjusted, absolute rate of return and capital growth and/or income from investment in catastrophe bonds, also referred to as “cat bonds” (“insurance-linked securities” or “ILS”).

AXA IM Maturity 2023 Fund

The investment objective of the Fund is to aim to generate income by investing primarily in corporate high yield debt securities based on the assumption of a holding period up to 29 September 2023, being the maturity date of the Fund or such other business days as may be determined by the Directors in consultation with the Manager and notified to Shareholders in advance. It is currently proposed that the Fund will terminate on or about 29 September 2023 and as a result the financial statements are prepared on a basis other than going concern for the period ended 30 June 2023.

AXA IM Sunshine 2023/1

The investment objective of the Fund is to seek to generate income and achieve capital appreciation measured in Euro over a 6 year investment period by investing in a diversified portfolio of global fixed income and equity asset classes. The Fund terminated on 8 February 2023 and as a result the financial statements are prepared on a basis other than going concern for the period ended 30 June 2023.

AXA IM Sunshine 2023/2

The objective of the Fund is to seek to generate a performance/return which exceeds the rate of Eurozone inflation in Euro from an actively managed portfolio over a medium term horizon. The Fund terminated on 17 May 2023 and as a result the financial statements are prepared on a basis other than going concern for the period ended 30 June 2023.

AXA IM Multi Asset Target 2026

The investment objective of the Fund is to seek, over the period until 30 March 2026, being the maturity date of the Fund or such other business days as may be determined by the Directors in consultation with the Manager and notified to Shareholders in advance, and through a discretionary tactical allocation of investments between several asset classes (being international equities, emerging market bonds and high yield bonds), long term capital growth and a lower volatility compared to a well-diversified portfolio of liquid equities representing a broad spread of the largest OECD equity markets (including the EU and US), in order to achieve an annualised return between 2% and 6%, net of management fees, in EUR.

AXA IM WAVE Biotech Fund

The investment objective of the Fund is to seek to provide long term capital growth. The Fund will seek to achieve its investment objective by investing in equity securities and equity-related securities (such as preferred stocks as well as depository receipts for such securities) of listed companies, principally in the biotechnology, genomic and medical research industry, which the Manager and the AXA Investment Managers UK Limited (the “Sub-Investment Manager”) believe have the potential to provide above-average returns based on the higher growth nature of the biotechnology sector. Further, the Fund targets companies that are offering the highest probability of clinical, regulatory and commercial success. The Manager and the Sub-Investment Manager has full discretion to select investments for the Fund in line with the investment policy and in doing so may take into consideration the NASDAQ Biotechnology index.

Delegio Privilege Cautious Fund

The investment objective of the Fund is to seek to provide long term capital growth. The Fund will seek to achieve its investment objective by investing directly or indirectly (in particular through the use of eligible investment funds and derivatives) in a diversified portfolio of global equity and fixed income securities. The Fund will have a cautious

BACKGROUND TO THE ICAV (continued)

Investment Objective of the Funds (continued)

Delegio Privilege Cautious Fund (continued)

approach with a preference towards lower risk assets, such as bonds. This approach means that the investments will be mainly in investment grade fixed income securities, which are less volatile securities with high credit quality rating and the potential equity allocation is capped at 32.5% of the Fund's net assets.

Delegio Privilege Balanced Fund

The investment objective of the Fund is to seek to provide long term capital growth. The Fund will seek to achieve its investment objective by investing directly or indirectly (in particular through the use of eligible investment funds and derivatives) in a diversified portfolio of global equity and fixed income securities. Equity allocation is capped at 55% of the Fund's net assets.

Delegio Privilege Entrepreneurial Fund

The investment objective of the Fund is to seek to provide long term capital growth by investing a higher portion of the portfolio in equities. The Fund will seek to achieve its investment objective by seeking new opportunities and investing directly or indirectly (in particular through the use of eligible investment funds and derivatives) in a diversified portfolio of global equity and fixed income securities. The Fund is expected to achieve an entrepreneurial style by investing a higher portion of the portfolio in equities and will seek to purchase securities when it believes the market has not already reflected these expectations for these securities in the current stock price, considering factors such as: growth that exceeds the wider economy; identifiable competitive advantages; ability to take market share from competitors; attractive and improving margins; and sustainable above-average revenue and earnings growth. Equity allocation is capped at 77.5% of the Fund's net assets.

Delegio Privilege Ambitious Fund

The investment objective of the Fund is to seek to provide long term capital growth. The Fund will seek to achieve its investment objective by investing directly or indirectly (in particular through the use of eligible investment funds and derivatives) in a diversified portfolio of global equity and fixed income securities. Equity allocation is capped at 100% of the Fund's net assets.

AXA IM Euro Yield Target 2028

The investment objective of the Fund is to seek to generate performance through exposure to the fixed income universe to achieve an average annualized return, net of ongoing charges, over the life of the Fund of between 4% to 6%. The investment objective is not guaranteed and the potential return may be negatively impacted among others by the potential default risk and recovery rate of one or several issuers within the portfolio.

Calculation of Net Asset Value ("NAV") per Share

The NAV per share will be expressed in the local currency of the relevant share class as a per share figure. It shall be calculated by dividing the net assets attributable to the holders of redeemable participating shares by the total number of outstanding redeemable participating shares.

Securities which are listed or traded on a regulated market for AXA IM WAVE Cat Bonds Fund (except for ILS) and AXA IM Euro Yield Target 2028 are valued at the official closing prices. The valuation prices for ILS held by AXA IM WAVE Cat Bonds Fund are median of the relevant quotes based on mid prices from authorised brokers and dealers.

Securities which are listed or traded on a regulated market for AXA IM ACT US Short Duration High Yield Low Carbon, AXA IM Maturity 2023 Fund and AXA IM Multi Asset Target 2026 are valued at the prior day bid prices.

Securities which are listed or traded on a regulated market for AXA IM WAVE Biotech Fund are valued for US securities are priced at the opening prices; Asian securities are priced at the closing price; all other markets are priced at last trade at 2.30pm Irish Time.

BACKGROUND TO THE ICAV (continued)

Calculation of Net Asset Value (“NAV”) per Share (continued)

Securities which are listed or traded on a regulated market for Delegio Privilege Ambitious Fund, Delegio Privilege Balanced Fund, Delegio Privilege Cautious Fund and Delegio Privilege Entrepreneurial Fund are valued at the prior closing mid-price for equity like securities and prior day evaluated mean pricing for fixed income type securities.

Distribution Policy

Classes are available as either Accumulation Classes or Distribution Classes. Accumulation Classes capitalise income. Distribution Classes may pay a dividend to the relevant Shareholders. In case of payment of dividends, payment frequency will be annual (“Distribution” Classes) or quarterly (“Distribution Quarterly” Classes). In such case, dividends shall be paid out of the net investment income (i.e. investment income less expenses) available for distribution. The interest income from assets classified as fair value through profit or loss along with net realised gains and losses and movement in unrealised gains and losses disclosed in net income/(loss) on investments and foreign currency in the Statement of Comprehensive Income.

The Directors may determine annually, after the end of the relevant financial year, if and to what extent the Fund will pay dividends. Any dividend payments will be confirmed in writing to the Shareholders of Distribution or Distribution Quarterly Classes.

The Directors, in consultation with the Manager, may at any time determine to change the policy of the Fund with respect to dividends distribution. If the Directors, in consultation with the Manager, so determine, full details of any such change will be disclosed in an updated Prospectus or Supplement and Shareholders will be notified in advance.

MANAGER'S REPORT**AXA IM ACT US Short Duration High Yield Low Carbon**

The U.S. High Yield market posted a positive total return in the first half of 2023, as the ICE BofA Merrill Lynch U.S. High Yield Index generated a total return of +5.42% for the period. The positive return was driven by better than expected earnings, inflation grinding lower, and overall economic resilience. Flows into the High Yield market were negative in the first half of 2023 with -\$11.2 billion of outflows. On a quarterly basis, flows were -\$14.8 billion in the first quarter, followed by +\$3.6 billion in the second quarter. The High Yield primary priced \$95.6 billion of new issuance in the first half of 2023, which was up from the \$71.0 billion that priced during the first half of 2022. There was \$15.7 billion of high yield default volume during the period, and the par weighted high yield default rate as of June 30, 2023, was 1.64%, up from 0.84% at the beginning of the period.

For the first half of 2023, U.S. High Yield outperformed U.S. Corporates (+3.23%) and U.S. Treasuries (+1.63%), but underperformed U.S. Equities (S&P 500 +16.88%). Within U.S. High Yield, positive returns were driven by the lower end of the credit quality spectrum, as CCC-and-lower rated credits (+9.80%) outperformed both BB-rated credits (+4.18%) and B-rated credits (+5.72%). From a sector perspective, 17 of the 18 industry sectors posted positive total returns for the period. On a relative basis, Leisure (+10.18%), Retail (+7.96%) and Technology & Electronics (+6.19%) were the best performing sectors, while Banking (-1.39%), Telecommunications (+1.85%) and Media (+1.85%) were the worst performing sectors. During the first half of 2023, the High Yield Index's Option Adjusted Spread tightened 76 basis points, from 481 basis points as of December 31, 2022, to 405 basis points as of June 30, 2023. The High Yield Index's yield-to-worst ended the period at 8.56%, compared to 8.99% at the start of the period. The High Yield Index's average price was \$88.71 on June 30, 2023, \$2.83 higher than the \$85.88 average price at the start of the period.

The AXA IM ACT US Short Duration High Yield Low Carbon performed very well during a volatile but positive first half of 2023, capturing roughly three-quarters of the overall market's +5.42% return (gross and net of fees, USD). While performance was solid overall, it was somewhat limited by our up-in-quality positioning and security selection within the leisure sector. The yield-to-worst of the Strategy tightened by 18 bps to 7.43%, while the market yield tightened by 43 bps to 8.56%. The Option Adjusted Spread of the Strategy tightened by 81 bps to 254 bps. The overall Strategy duration (using a calculation of modified duration-to-worst) decreased from 2.7 to 2.4, while the market duration decreased from 4.2 to 3.9.

Position count increased slightly during the first half of 2023, and the Strategy remains well diversified. We believe that diversification of portfolio holdings is important for the Strategy and helps to manage credit risk. Our top holding, a 1.9% position, was CSC Holdings LLC. As of June 30, 2023, approximately 49% of the portfolio was invested in securities in excess of three years, but which we expect to be redeemed early. This is down roughly 5% from the start of the year. Market technicals were mixed during the first half of the year as flows were negative, while primary market issuance was more active but still fairly modest. While inflationary pressures have improved and the Fed is nearing (or at) the end of its rate hiking cycle, the full impact of this higher interest rate regime has yet to be determined. That being said, the overall economy has been resilient, raising hopes for a soft landing. Even if the US does enter a mild recession, we believe the high yield market is well positioned with healthy corporate credit metrics and a relatively benign default rate outlook. We expect interest rates and inflation expectations to continue to drive near-term market movements, however even after solid performance year-to-date, valuations are attractive and represent a buying opportunity. With markets focused on the trajectory of interest rates and the potential for a US recession, we believe the Short Duration High Yield Low Carbon remains well positioned in this market environment.

MANAGER'S REPORT (CONTINUED)

AXA IM WAVE Cat Bonds Fund

The AXA IM WAVE Cat Bonds Fund has the investment objective of achieving a long-term, risk-adjusted, absolute rate of return and capital growth and/or income from investment in catastrophe bonds.

The fund invests in various insurance-linked securities (ILS). The main strategy is to create a diversified portfolio of insurance risks.

The first two quarters of 2023 have experienced a large number of natural catastrophes made more costly than in previous years by the still present even if less acute inflation trend started last year and due to Covid-19 and the conflict in Ukraine. In the first half of 2023, the overall economic losses from natural catastrophes amounted to USD 120 billion, compared to USD 123 billion the prior-year period, 46% above the ten-year average. The global insured losses from natural catastrophes stand at USD 50 billion (USD 48 billion in H1 2022), which is the second costliest first half since 2011. US thunderstorms are the main driver of global insured losses from natural catastrophe. Indeed, in the US, a series of severe thunderstorms prompted insured losses of USD 34 billion in the first half of 2023, the highest ever insured losses in a six-month period. Ten events caused losses of USD 1 billion and above each, compared to an annual average of six events for the previous ten years. The earthquake in Türkiye and Syria was the costliest disaster of the year so far both in terms of economic and insured losses which are respectively USD 34 billion and USD 5.3 billion according to Swiss Re. The severe weather events in Italy and New Zealand leading to mostly flood-related damage also contributed to the insured loss burden of the first half-year with estimated losses of respectively USD 0.6 and 2.3 billion. There is still a challenge for the insurance industry regarding the reliability of the modelling of secondary perils as they represent an increasing share of insured losses in recent years but remained a rather limited portion of the expected loss.

In the ILS space, around USD 10.0 billion of public cat bonds have been issued in the first six months of 2022, which is already higher than the issuances seen for the full year 2022 (USD 9.4 billion). The market size has increased significantly compared to the end of last year with an outstanding amount of USD 38.9 billion. Both primary and secondary markets have been very active in the first half of 2023. Following the repricing in 2022, the reinsurance capacity impairment by losses from some events (including hurricane Ian) and mark-to-market decrease on their investments, the consistently high demand for reinsurance from direct insurers and inflation concerns, the spreads increased significantly due to an imbalance between offer and demand of ILS. However, due to some asset maturities and inflows into the ILS asset class during the first half of the year, the cash positions of most ILS managers increased, leading to a spread tightening compared to the levels observed at the end of last year. Most deals priced at the lower end of spread guidance or even lower despite the exceptionally active primary market. However, the current levels are still high. There was some innovation in the cat bond market during the first part of the year with the issuance of the first ever cyber bond. Several new sponsors came in the market and some new perils (New Zealand earthquake...) are not covered in the cat bonds market. Due to inflation concerns and the loss activity observed in the recent years, traditional reinsurance markets conditions have improved significantly in the last renewals too. The Rate-on-Line (RoL or spread in the financial market) increased between +20% and +40% in the United States for property catastrophe programs unaffected by losses while we saw increases of +35% to +75% on loss-hit ones. Increase has been more limited outside of the US but still high with increases of price often between 5% and 25%. As private deals (collateralized reinsurance contracts) are renewed on a yearly basis there is a lag in the spread adjustment compared to the cat bonds.

For the first six months of the year, the performance of the AXA IM WAVE Cat Bonds Fund was very positive for the reference "I USD Capi" share class. This good performance for the fund was mostly driven by the coupons, some recoveries on Ian-impacted cat bonds due to lower than initially estimated losses following the publication of loss reports and the mark-to-market gains on nearly all cat bonds due to the spread tightening. This was slightly offset by the seasonality effect as we entered into the US hurricane season. Share classes hedged in other currencies than USD (EUR, CHF...) have had a lower performance than the reference USD share class (I USD Capi) due to the difference of interest rate in the various currencies and hedging cost. Our strategy continued to perform well compared to our peers, thanks to a sound portfolio management and asset selection.

For the rest of 2023, banks and brokers expect to bring new sponsors to the market and the pipeline will remain strong. We anticipate that the available capacity provided by market participants will be in line with the offer to back a stabilisation of the spreads at their current levels. As for previous years, the fund will prefer investing in

MANAGER'S REPORT (CONTINUED)

MANAGER'S REPORT (CONTINUED)

AXA IM Maturity 2023 Fund

Market review

The last six months have been particularly varied in financial markets. Indeed, to look only at some of the strong, headline YTD returns - +11.5% for the Eurostoxx 600; +32.3% for the Nasdaq; +4.4% for the ICE BofA European Currency HY Index – is to miss a lot of the volatility behind those figures.

Indeed, the year began with something of a continuation of the key themes from 2022. A strong January for risky assets followed positive headlines around lower European gas prices, and China suddenly lifting its Covid restrictions. However, this was curtailed by a weaker February - strong US economic data and sticky inflation figures led investors to worry that the peak in the Fed's hiking cycle was, once again, further away than hoped. The yield on 2-year US Treasuries reached a post-2007 high of 5.1% in early March. However, there was a sea change in the middle of that month after the failure of a number of US regional banks and, ultimately, Credit Suisse in Europe. The MOVE index of Treasury volatility hit levels last seen at the height of the Global Financial Crisis in 2008, and that same 2-year note swiftly fell over 100bps - including its largest daily decline since 1981. Market participants were very concerned about contagion within the financial system, amid signs that the Fed's rapid tightening of financial conditions might well have "broken" something.

However, even though US regional bank failures continued into early May, markets quite quickly put these concerns to rest. And even though central banks continued with their tough actions (after two more 25bps hikes, the ECB's policy rate reach 3.5% in June), markets were finally willing to believe that inflation was on a sustainable path lower. Equities, particularly in the US, were also given a boost by the rapid emergence of AI. We ended the period with investors beginning to hope that the much desired "soft" landing may well be achievable.

As stated above, the net result was that the ICE BofA European Currency HY Index returned +4.4% during the period. Most of this was came from excess returns, as the spread over government bonds tightened from 528bps to 476bps. Although riskier Bs outperformed BBs (+5.6% compared to +4.0%, respectively), CCCs, the riskiest part of the universe, underperformed. They returned only 0.5%, the result of a few large credits faring particularly poorly.

(Sources: all Bloomberg)

Performance

In the period under review, the Fund generated a total net return of +2.74% (I share, net of fees) and +3.15% (I share, gross of fees). The all-maturities universe, the ICE BofA European Currency High Yield Index, delivered a return of +4.3% (€ hedged).

Outlook

The performance of European High Yield in the first half of 2023 is the third best start to a year in the last decade. Interestingly, the return of +4.4% is almost exactly half the yield of 8.0% that was available on January 1st – demonstrating the importance, and benefit, of carry in the current uncertain environment.

The fund actually now has very limited exposure to the high yield market. It is invested entirely in very short duration and high quality assets – including increasing numbers of French and German government bonds. Further bond redemptions over the final few months of the fund's life will continue to be invested in this way.

MANAGER'S REPORT (CONTINUED)

AXA IM Multi Asset Target 2026

Economic and Markets overview

It was a better start to the year as economic activity continued to hold up surprisingly well despite elevated levels of inflation and higher interest rates. Equities reacted well to stronger earnings whilst Fixed Income markets began to discount peak inflation and peak Central Bank rates.

Performance

The equity futures allocation strategy had a negative impact on first-half performance, mainly due to our underweighting of the eurozone in the first quarter. This hedging nearly offset the positive performance of the investments in equity funds.

Fixed income investments showed positive performance this semester after the very bad 2022. Diversification brought value, notably the investment in the AXA IM WAVE Cat Bonds fund.

The fund posted a net total return of +0,34% over the period.

Activity

During the semester, we increased our exposure to equities due to robust growth in the United States. Overall, we mobilized cash accumulated since the beginning of the period to support this increase in equity exposure.

We have increased our exposure to emerging market bonds, buoyed by optimism of an early recovery in Chinese growth. Moreover, the emerging economies, having raised rates before the developed countries, seem more inclined towards monetary easing. In view of this, we opted for emerging markets rather than high yield (HY), where spreads were already tight and offered little prospect of medium-term performance.

Outlook

This remains a complex environment as the much-heralded US recession refuses to arrive and US activity remains surprisingly robust. We were in the recession camp for almost a year but now must admit that the likelihood of a US recession has diminished. Inflation has already peaked and is decelerating in the US without a material softening of economic activity, contrary to what we expected. This should continue to be positive for US equities.

The picture is different in Europe. Eurozone PMIs fell sharply in July, pointing to a recession while the economy is already stagnating. Meanwhile, the credit data also continues to deteriorate. Clearly this does not bode well for economic activity in the second part of the year and justifies maintaining a more cautious stance on Eurozone equities.

Chinese activity also continues to disappoint, and the economy is also grappling with disinflation.

Q2 earnings season were overall better than expected as the US consumer holds up well. Equity market performance has been driven by multiple expansion this year which cannot be maintained in a regime of higher interest rates. Earnings growth needs to be the next catalyst to push markets higher so details from companies on how they see the outlook will be scrutinized. The recent back up in bond yields has also increased the attractiveness of certain fixed income assets again and so we will be looking for opportunities in this space too.

MANAGER'S REPORT (CONTINUED)

AXA IM WAVE Biotech Fund

The first half of 2023 has been challenging as demand for equities has continued to be slower given the macro-economic backdrop. The sector itself has also faced some specific challenges in particular the Food and Drug Administration (FDA) in the US delaying approvals to drugs widely expected to be approved on time and the US Federal Trade Commission (FTC) taking a hard look at some of the larger announced M&A deals.

Nevertheless, research and development (R&D) progress continues, with several positive updates and in the majority of cases commercial launches are meeting and beating expectations as the sector proves its defensive characteristics.

The AXA IM WAVE Biotechnology Fund was approximately flat year to date and outperformed the Nasdaq Biotech Index by c.3%. Three smaller cap companies, Moonlake Therapeutics, X4 Pharmaceuticals and Savara, the latter two having been held in the Fund for several years contributed meaningfully to performance over the period as clinical data release supports valuation therefore sets upside investors' expectations for material clinical catalysts ahead.

M&A activity continues with a number of target stocks held in the Fund. Our investment approach continues to target ownership of quality biotechnology stocks where we anticipate positive clinical and regulatory updates and can see prospects for good revenue growth and conversion to profitability. The revenue growth outlook for the Fund on a probability adjusted basis is c.15% per annum over the next 3 years.

Outlook

Broader market sentiment will continue to impact the share prices of stocks within the biotech sector. Within a macro-driven, risk-off environment that is difficult to navigate for equity prices generally, we believe therapeutic innovation will continue to be valued and appreciated, as we have seen in the last 12 months. While the US FDA remains supportive, we are seeing evidence of increased scrutiny and caution, especially in certain therapeutic areas. High-profile data and regulatory catalysts from individual firms that have readthrough for the broader biotech sector set to dominate investor sentiment, resulting in volatility. Our investment philosophy around focusing on quality and execution within the investment universe stays intact despite the challenges.

The US political landscape is important for healthcare generally and biotech specifically with regards to patient access and drug pricing. Therefore, over the course of the year, the focus will likely remain on the Inflation Reduction Act as the government conveys how it will implement the Act and discloses its initial drug negotiation list for 2026 in September.

There are closely watched drug launches ongoing for obesity and Alzheimer's disease. How these drugs perform commercially, particularly with regards to patient access and reimbursement, is going to be important for drugmakers and investors to assess the significant market opportunities.

More M&A activities are expected, given large pharma's cash capabilities and strong intent for deals. We are currently annualising M&A \$ value close to all-time highs. That said, the surprising FTC lawsuit to block Amgen's proposed acquisition of Horizon Therapeutics on drug bundling practices could be precedent setting and adds another element of antitrust risk for consideration when it comes to deals.

MANAGER'S REPORT (CONTINUED)

Delegio Privilege Ambitious Fund, Delegio Privilege Balanced Fund, Delegio Privilege Cautious Fund and Delegio Privilege Entrepreneurial Fund

It was a better start to the year as economic activity continued to hold up surprisingly well despite elevated levels of inflation and higher interest rates. Equities reacted well to stronger earnings whilst Fixed Income markets began to discount peak inflation and peak Central Bank rates.

The performance of all 4 profiles was positive

Performance was as follows for the Accumulation share class:

Delegio Privilege Ambitious Fund - 7.3% NET

Delegio Privilege Balanced Fund - 3.67% NET

Delegio Privilege Cautious Fund - 1.89% NET

Delegio Privilege Entrepreneurial Fund - 5.33% NET

In terms of contribution to performance the best performing asset classes were Global Large caps which delivered 11.45% followed by Global Small Caps 7.54% (USD). The runners up were Global High Yield at 3.7%, Emerging Market Debt at 2.75%, Euro Credit IG at 2.07%, Euro Government Bonds at 2.11% and Infrastructure at 1.04%.

The only asset class to deliver negative returns was Real Estate which was strangled by higher interest rates and so declined by -1.17%.

The underperformance of our Global Small Cap strategy, quality blend Large Cap strategy and infrastructure relative to the performance of Global Large caps was a drag on absolute performance.

The best performing stocks included Apple, Alphabet, Amazon, TESLA and Service Now and most more than recovered the weak performance in 2022. Technology was a strong performer this semester as the hype around Artificial Intelligence drove many of the related stocks much higher.

Several changes to allocation were made over the course of the semester mostly with the aim of increasing equity exposure in the portfolios. Despite a prudent stance towards equities overall there continue to be areas that we like. We continued to add to the direct line thematic allocation at the expense of the blend strategy. Despite a complicated macro environment many of our thematic investments continue to benefit from strong secular tailwinds. The euphoria around Artificial Intelligence was also a boost. We continued to reduce Small Cap exposure and switched to large cap thematic stocks. We took profits at the end of the second quarter on the tactical diversification into Emerging Market equities as the Chinese economic rebound disappointed. We also hedged part of the USD currency exposure and took profits on this strategy in June.

On the fixed income side, we continued to invest in Eurozone Credit and were active in the Primary market.

Outlook

This remains a complex environment as the much-heralded US recession refuses to arrive and US activity remains surprisingly robust. We were in the recession camp for almost a year but now must admit that the likelihood of a US recession has diminished. Inflation has already peaked and is decelerating in the US without a material softening of economic activity, contrary to what we expected. This should continue to be positive for US equities.

The picture is different in Europe. Eurozone PMIs fell sharply in July, pointing to a recession while the economy is already stagnating. Meanwhile, the credit data also continues to deteriorate. Clearly this does not bode well for economic activity in the second part of the year and justifies maintaining a more cautious stance on Eurozone equities.

Chinese activity also continues to disappoint, and the economy is also grappling with disinflation.

Delegio Privilege Ambitious Fund, Delegio Privilege Balanced Fund, Delegio Privilege Cautious Fund and Delegio Privilege Entrepreneurial Fund (continued)

Q2 earnings season were overall better than expected as the US consumer holds up well. Equity market performance has been driven by multiple expansion this year which cannot be maintained in a regime of higher interest rates. Earnings growth needs to be the next catalyst to push markets higher so details from companies on how they see the outlook will be scrutinized.

The recent back up in bond yields has also increased the attractiveness of certain fixed income assets again and so we will be looking for opportunities in this space too.

AXA IM Euro Yield Target 2028

Market review

The last six months have been particularly varied in financial markets. Indeed, to look only at some of the strong, headline YTD returns - +11.5% for the Eurostoxx 600; +32.3% for the Nasdaq; +4.4% for the ICE BofA European Currency HY Index – is to miss a lot of the volatility behind those figures.

Indeed, the year began with something of a continuation of the key themes from 2022. A strong January for risky assets followed positive headlines around lower European gas prices, and China suddenly lifting its Covid restrictions. However, this was curtailed by a weaker February - strong US economic data and sticky inflation figures led investors to worry that the peak in the Fed's hiking cycle was, once again, further away than hoped. The yield on 2-year US Treasuries reached a post-2007 high of 5.1% in early March. However, there was a sea change in the middle of that month after the failure of a number of US regional banks and, ultimately, Credit Suisse in Europe. The MOVE index of Treasury volatility hit levels last seen at the height of the Global Financial Crisis in 2008, and that same 2-year note swiftly fell over 100bps - including its largest daily decline since 1981. Market participants were very concerned about contagion within the financial system, amid signs that the Fed's rapid tightening of financial conditions might well have "broken" something.

However, even though US regional bank failures continued into early May, markets quite quickly put these concerns to rest. And even though central banks continued with their tough actions (after two more 25bps hikes, the ECB's policy rate reach 3.5% in June), markets were finally willing to believe that inflation was on a sustainable path lower. Equities, particularly in the US, were also given a boost by the rapid emergence of AI. We ended the period with investors beginning to hope that the much desired "soft" landing may well be achievable.

As stated above, the net result was that the ICE BofA European Currency HY Index returned +4.4% during the period. Most of this was came from excess returns, as the spread over government bonds tightened from 528bps to 476bps. Although riskier Bs outperformed BBs (+5.6% compared to +4.0%, respectively), CCCs, the riskiest part of the universe, underperformed. They returned only 0.5%, the result of a few large credits faring particularly poorly.

(Sources: all Bloomberg)

Performance

In the very brief period since it was launched on 14th June, the Fund generated a total net return of -1.41% (I share, net of fees) and -1.39% (I share, gross of fees). The all-maturities universe, the ICE BofA European Currency High Yield Index, delivered a return of -0.66% (€ hedged).

Outlook

As the first half of 2023 ends, so this represents a good opportunity to review the last six months. European High Yield has returned a very respectable +4.4% - the third best start to a year in the last decade. Single-Bs have outperformed BBs (+5.6% compared to 4.0%) whilst CCCs have lagged well behind them both (+0.5%). Clearly, such backwards-looking figures do not necessarily lend themselves to an "outlook." But we think they do help to illustrate a key positive that we currently see for the asset class, and in particular for this newly launched fund.

Interestingly, the year-to-date performance of +4.4% is almost exactly half the yield of 8.0% that was available on January 1st. We have taken great comfort in recent times from the level of yield on offer in our market – the "carry." Now, the coming default rate cycle has been much discussed and, clearly, any kind of economic downturn will begin to eat into these returns; it's why we are happy to remain defensively positioned. Indeed, in the first couple of days of July, the US flash ISM manufacturing data came in at just 46 – firmly in recessionary territory, and the lowest since the early stages of the Covid pandemic in May 2020.

On the other hand, the fund yields over 7.0%, this is not only healthy compensation for the rest of the year, as we wait for the cycle to turn, but, more pertinently for a product with a fixed, 5-year maturity, provides a great entry point for investing through this cycle. In the last two decades of the European High Yield markets' existence, such

MANAGER'S REPORT (CONTINUED)

AXA IM Euro Yield Target 2028 (continued)

starting yields have historically corresponded with very healthy returns over the subsequent five years (source: AXA IM). As mentioned above, a downturn will introduce some volatility in the short-term. But for those with the ability to hold the course, and take advantage of opportunities as they arise, we believe that long-term outcomes are likely to be attractive.

The accompanying notes form an integral part of the financial statements.

Notes to the Financial Statements

1. ORGANISATION

AXA IM World Access Vehicle ICAV (the “ICAV”) is an open-ended umbrella type Irish collective asset management vehicle with limited liability and segregated liability between Funds, registered by the Central Bank on 12 May, 2016 to carry on business as an ICAV pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) and under the Central Bank (Supervision & Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (together the “UCITS Regulations”).

2. BASIS OF PREPARATION & SUMMARY OF ACCOUNTING POLICIES

Basis of Preparation

These condensed interim financial statements for the six months ended 30 June 2023 have been prepared in accordance with IAS 34 ‘Interim Financial Reporting’, the UCITS Regulations and the ICAV Act. The condensed interim financial statements do not contain all of the information and disclosures required in the full annual financial statements and should be read in conjunction with the financial statements of the ICAV for the year ended 31 December 2022, which have been prepared in accordance with International Financial Reporting Standards as adopted by the EU (“IFRS”). The auditor’s report in the audited year-end financial statements as at 31 December 2022 was unqualified.

The condensed interim financial statements have been prepared on a going concern basis, except for AXA IM Sunshine 2023/1, AXA IM Sunshine 2023/2 and AXA IM Maturity 2023 Fund. The financial statements for AXA IM Sunshine 2023/1 and AXA IM Sunshine 2023/2 have been prepared on a non-going concern basis as the Funds ceased operations and closed on the date of 8 February 2023 and 17 May 2023 respectively. The financial statements for AXA IM Maturity 2023 Fund have been prepared on a non-going concern basis as it is expected that the Fund will cease operations and close on 29 September 2023 being within a twelve month period from the date of approval of the financial statements.

The financial statements have been prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

All references to net assets throughout the document refer to net assets attributable to holders of redeemable participating shares unless otherwise stated.

The accounting standards have been applied consistently by the ICAV.

The functional and presentation currency for AXA IM ACT US Short Duration High Yield Low Carbon, AXA IM WAVe Cat Bonds Fund, AXA IM US High Yield FMP 2022 and AXA IM WAVe Biotech Fund is US Dollar and the functional currency of AXA IM Maturity 2023 Fund, AXA IM Sunshine 2023/1, AXA IM Sunshine 2023/2, AXA IM Multi Asset Target 2026, Delegio Privilege Ambitious Fund, Delegio Privilege Balanced Fund, Delegio Privilege Cautious Fund, Delegio Privilege Entrepreneurial Fund and AXA IM Euro Yield Target 2028 is Euro.

New standards, amendments and interpretations issued and effective for the financial period beginning 1 January 2023

There are no new standards, amendments or interpretations issued and effective for the financial period beginning 1 January 2023 that have a significant impact on the ICAV’s financial position, performance or disclosures in its financial statements.

New standards, amendments and interpretations issued but not effective for the financial period beginning 1 January 2023 and not early adopted

There are no standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the ICAV’s financial position, performance or disclosures in its financial statements.

* Fund terminated on 30 June 2022.

There were no distributions payable as at 30 June 2023 (31 December 2022: Nil).

Notes to the Financial Statements (continued)

9. TAXATION

Under current law and practice the ICAV qualifies as an Investment Undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 (“the TCA”), as amended. Provided the ICAV continues to be resident for tax purposes in Ireland and is authorised by the Central Bank of Ireland, the ICAV should not be chargeable to Irish tax on its relevant income or gains.

However, Irish tax may arise on the happening of a “chargeable event”. A chargeable event includes any distribution payment to shareholders, any encashment, redemption, cancellation or transfer of shares, and any deemed disposal of shares for Irish tax purposes arising as a result of holding shares in the ICAV for a period of eight years or more.

No Irish tax will arise in respect of chargeable events in respect of a Shareholder who is an Exempt Irish Investor (as defined in Section 739D of the TCA) or who is neither Irish resident nor ordinarily resident in Ireland for tax purposes at the time of the chargeable event, provided, in each case, that an appropriate valid declaration in accordance with Schedule 2B of the TCA is held by the ICAV and the ICAV is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct or where the ICAV has been authorised by Irish Revenue to make gross payments in the absence of appropriate declarations.

Distributions, interest and capital gains (if any) received on investments made by the ICAV may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the ICAV or its Shareholders.

10. TRANSACTIONS WITH RELATED PARTIES AND CONNECTED PERSONS

AXA Investment Managers Paris has been appointed as the Manager. The Management fee earned for the financial period and outstanding at the financial period end is disclosed in the Statement of Comprehensive Income and Statement of Financial Position.

As at 30 June 2023 and 31 December 2022, there were two management shares in issue. The management shares are held by AXA Investment Managers S.A. and AXA Investment Managers Paris.

Jean Louis Laforge is an executive officer, also employee of the Manager and a Director of AXA World Funds.

Ouajnat Karim is an employee of AXA Investment Managers UK Limited which has been appointed as a sub-investment manager to certain Funds.

Notes to the Financial Statements (continued)

10. TRANSACTIONS WITH RELATED PARTIES AND CONNECTED PERSONS (continued)

Transactions with connected persons

Regulation 43 of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”) requires that any transaction between a UCITS and a connected person is conducted at arm’s length and be in the best interests of the shareholders of the UCITS.

For the purpose of Regulation 42 of the Central Bank UCITS Regulations a “connected person” means the management company or depositary to a UCITS; and the delegates, or sub-delegates of such a management company or depositary (excluding any non-group company sub-custodians appointed by a depositary); and any associated or group company of such a management company, depositary, delegate or sub-delegate.

The Directors are satisfied that (i) there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with a connected party (as defined in Regulation 42 of the Central Bank UCITS Regulations) and (ii) all transactions with connected parties entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1) of the Central Bank UCITS Regulations.

11. PARTICIPATING SHARE TRANSACTIONS

Subscription Fee/Minimum Holding/Redemption Limit

The ICAV may charge a subscription fee on the subscription of Shares in the Funds as following:

AXA IM ACT US Short Duration High Yield Low Carbon

Class	Maximum Subscription Fee rate
A (Retail)	3.00%
A-S	3.00%
A-S2	3.00%
E (Distributor)	None
F (Clean share class)	2.00%
I (Institutional)	None

AXA IM WAVE Cat Bonds Fund

The ICAV may charge a subscription fee up to 3% on the aggregate investment amount subscribed.

AXA IM Maturity 2023 Fund

Class	Maximum Subscription Fee rate
A (Retail)	3.00%
E (Distributor)	None
F (Clean share class)	2.00%
I (Institutional)	None

AXA IM Multi Asset Target 2026

AXA IM Euro Yield Target 2028

Class	Maximum Subscription Fee rate
A (Retail)	3.00%
E (Distributor)	None
F (Clean Share class)	2.00%
I (Institutional)	None

Notes to the Financial Statements (continued)

11. PARTICIPATING SHARE TRANSACTIONS (continued)

Subscription Fee/Minimum Holding/Redemption Limit (continued)

Investors will not be charged a subscription fee on the subscription of Shares for Delegio Privilege Ambitious Fund, Delegio Privilege Balanced Fund, Delegio Privilege Cautious Fund and Delegio Privilege Entrepreneurial Fund.

There is no minimum holding in place for shares held in the Funds except AXA IM WAVE Cat Bonds Fund. Please refer to the Supplement for details regarding minimum holding.

The Manager may waive the subscription fee in whole or in part in respect of any investor, which may include an AXA Group investor for AXA IM Maturity 2023 Fund, AXA IM ACT US Short Duration High Yield Low Carbon, AXA IM Multi Asset Target 2026, AXA IM WAVE Biotech Fund and AXA IM Euro Yield Target 2028.

Where the total requests for redemption on any Dealing Day exceed at least 10% of the total number of Shares in the Funds or at least 10% of the NAV of the Funds and the Directors decide to refuse to redeem any Shares in excess of 10% of the total number of Shares in the Funds or 10% of the NAV of the Funds or such higher percentage that the Directors may determine, the ICAV shall reduce pro rata any request for redemption on that Dealing Day and shall treat the redemption requests as if they were received on each subsequent Dealing Day until all the Shares to which the original request related have been redeemed.

Swing pricing

Subscriptions or redemptions in a Fund or share class can create dilution of the Fund's or the share class's assets if shareholders subscribe or redeem at a price that does not necessarily reflect the real dealing and other costs that arise when the Manager buys or sells assets to accommodate net subscriptions or net redemptions. In order to protect the interests of the existing shareholders of a Fund or a share class, a swing pricing mechanism may be adopted as appropriate if disclosed, and as further described, in the Supplement of the Fund. If the net subscriptions and redemptions based on the last available NAV on any valuation day exceed a certain threshold of the value of a Fund or a share class on that valuation day, as determined and reviewed on a periodic basis by the Manager, the asset value may be adjusted respectively upwards or downwards to reflect the dealing and other costs that may be deemed to be incurred in buying or selling assets to satisfy net daily transactions. The Manager may apply a swing pricing mechanism across any Fund or share class as described in the Supplement of the relevant Fund. The extent of the price adjustment will be set by the Manager to reflect estimated dealing and other costs and will not exceed 2% of the NAV.

None of the Funds applied swing pricing as at the financial period ended 30 June 2023 and financial year ended 31 December 2022.

The Net assets attributable to holders of redeemable participating shares in the Statement of Financial Position is inclusive of any swing adjustments applied to the Funds.

12. FINANCIAL RISK MANAGEMENT PROCESS

As an ICAV, the management of financial instruments is fundamental to the management of its business. The Manager is responsible, subject to the overall supervision and control of the Directors, for managing the assets and investments of the Funds of the ICAV in accordance with the investment objectives and guidelines approved by the Directors and policies set forth in the Prospectus and Supplements.

Fair Value Estimation

The ICAV classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3: Certain inputs for the asset or liability are not based on observable market data (that is, unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes “observable” requires significant judgement by the Manager. The Manager considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the financial period and are deemed to have occurred when the pricing source or methodology used to price an investment has changed which triggers a change in level as defined under IFRS 13. There was one transfer between Level 2 and Level 3 during the financial period (31 December 2022: Nil). Transfer from Level 2 into Level 3 during the period was a result of low trading activity as at 30 June 2023.

There was one investment classified as Level 3 as at 30 June 2023 (31 December 2022: Nil).

Notes to the Financial Statements (continued)

The following table presents the movement in Level 3 instruments for the period ended 30 June 2023:

	30 June 2023 USD
Opening balance	-
Transfer in	37,500
Closing value	37,500

Notes to the Financial Statements (continued)**13. FINANCIAL DERIVATIVE INSTRUMENTS**

The Funds may employ techniques and instruments for the purposes of efficient portfolio management and to provide protection against exchange rate risks in accordance with the conditions and limits as set down by the UCITS Regulations. At 30 June 2023 and during the period the Funds had investments in open forward foreign currency exchange contracts. The forward foreign currency exchange contracts are employed for both investment and hedging purposes. The income arising from these contracts cannot practically be split from the total return of the forward currency contracts. The realised and unrealised gain/(loss) on these contracts is included in net income/(loss) on investments and foreign currency in the Statement of Comprehensive Income.

The exposure obtained through financial derivative instruments and the identity of the counterparty to these instruments are disclosed in the Schedule of Investments. There was no collateral received or collateral pledged as at 30 June 2023 and 31 December 2022 and during the financial period and year.

The Funds did not employ techniques for the purposes of efficient portfolio management as at 30 June 2023 and during the financial period. Consequently, there was no collateral received as at 30 June 2023 and during the financial period.

14. CONTINGENT ASSETS AND CONTINGENT LIABILITIES

There were no contingent assets and liabilities as at 30 June 2023 and 31 December 2022.

15. SEASONAL AND CYCLICAL CHANGES

The ICAV has not been subject to seasonal or cyclical changes during the period, please refer to the Manager's Report for further information.

16. SIGNIFICANT EVENTS DURING THE PERIOD

See Note 8 for details of distributions declared during the financial period to 30 June 2023.

Oujnat Karim was appointed as Director of the ICAV on 23 January 2023.

A full list of portfolio changes during the financial period is available to shareholders upon request.

* Fund launched on 14 June 2023.

GENERAL INFORMATION

Total Expense Ratio

The TER is equal to the ratio of the total operating costs to the average NAV. Total operating costs are expenses deducted from the assets for the relevant fiscal period.

The average NAV is calculated using the NAV as at each valuation point.
